	Examiner Steven H VerSteeg	Art Unit 1753	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

2. The disclosure is objected to because of the following informalities: the patent number for the parent application needs inserted on page 1.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 25 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. Claim 25 recites the limitation "the halftone phase shift mask blank" in lines 1-2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for

Art Unit: 1753

patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

7. Claim 22 is rejected under 35 U.S.C. 102(b) as being anticipated by US 6,086,728 to Schwartz et al. (Schwartz).
8. For claim 22, Applicant requires a manufacturing apparatus comprising at least a load lock mechanism, a substrate conveying mechanism, sputter chamber, and an unload lock mechanism.
9. Schwartz discloses an apparatus (col. 2, l. 55 – col. 3, l. 6) comprising an entry load lock 72, exit load lock 76, sputter chamber (Figure 7), and substrate conveying mechanism 100.
10. Claims 23 and 24 are rejected under 35 U.S.C. 102(e) as being anticipated by US 2002/0017910 A1 to Sakai.
11. For claim 23, Applicant requires a manufacturing apparatus of a photo mask blank comprising a substrate laying base having a rotation mechanism and a target disposed opposite to a position whose center axis deviates from a center axis of the substrate. For claim 24, Applicant requires the target and substrate to be disposed so that opposite surfaces of the substrate and target form a predetermined angle therebetween.
12. Sakai discloses a substrate processing device (abstract) comprising a substrate support 105 that rotates [0052], and a target 115 offset from the substrate (Figure 1) at a predetermined angle.
